# Accumeter Visible Spectrophotometer

SP-800 series

#### Product description

The SP-800 series single beam visible spectrophotometers are a low-cost, easy-to-use, and reliable general purpose instrument designed for laboratories and educational needs. The SP-800 series visible beam spectrophotometer comes with 2 models. The SP-830+ standalone model measures the traditional absorbance, transmittance and concentration. And the PC enabled SP-880 with enhance measurement features such as spectrum scan, kinetic, quantitative.

The SP-800 series visible spectrophotometers are a compact, low-cost instrument with all the essentials for teaching and routine laboratory use.

#### **Key Features**

#### ■ Reliable optical design to ensure accurate results

With minimum moving parts there is little maintenance need to be performed on the SP-800 series. The optical system is built in with a grating monochromator to provide a wavelength of  $320 \text{nm} \sim 1100 \text{nm}$ .

#### ■ Simple to read LCD display

With the 2 line LCD display, users can easily operate and read the result on the instrument.

#### ■ Versatile sample compartment for flexibility

The versatile sample compartment allows the SP-800 series to hold a wide range of cuvettes, test tubes, and cells, thus providing the flexibility for teaching laboratories and routine use for accurate and efficient measurements.

#### ■ Build-in validation tool for trouble shooting

The built-in validation tool within the SP-800 series can help users check wavelength accuracy and bandwidth without taking the instrument to a technician for verification.

Reliable accurate and easy to use for all applications

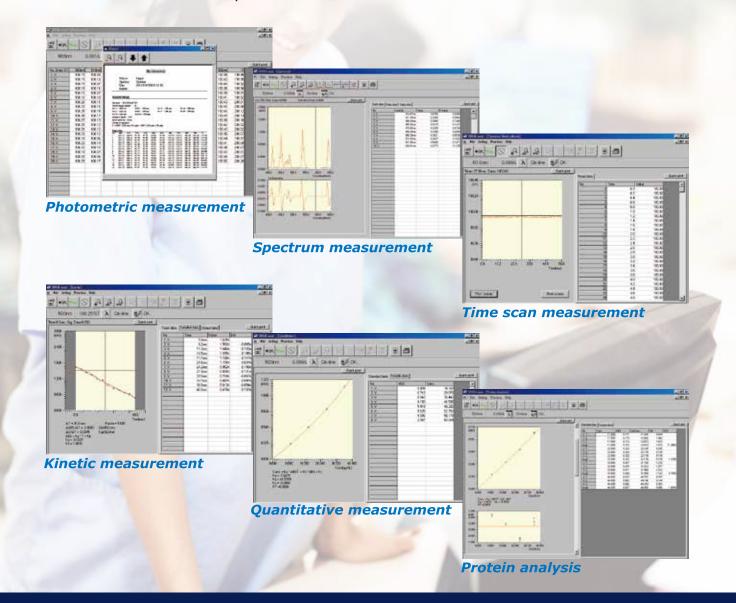

#### **Key Features**

# ■ Advanced measuring features only found in high end instrument (SP-880 only)

The SP-880 includes advance measuring features found only in high end instruments such as spectrum, time scan, kinetic, quantitative, and protein analysis to provide researchers with a instrument that meets all their needs.

#### ■ Flexible PC software to enhance measuring method (SP-880 only)

The SP-880 also comes with a PC-Mate software to help users store or export their data onto a PC or to an Excel spreadsheet.

## Specification

| Model Number             | SP-880                                     | SP-830+                                    |
|--------------------------|--|--|
| Optical Design           | Single beam                                | Single beam                                |
